DETAILED ACTION

Priority

- 1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:
- 2. This application cannot be a "national stage application" of a US nonprovisional application as the "national stage" is entered from a filed PCT application. It appears that this case is claiming priority under 35 USC 120, not 371 and thus the statement should possibly read "This is a CON of Application No. 09/865,349, filed 25 May 2001." should be entered following the title of the invention or as the first sentence of the specification. Also, the current status of all nonprovisional parent applications referenced should be included.

As the required statement is not valid, priority cannot be granted, at this time.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 26 and 27 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over any of the Cohen patents in view of either Kietaibl or Kee.

Any of the Cohen patents show the claimed invention except for the use of a combination of a shaker noise device and a bottle opener. Either Kietaibl or Kee suggests that a bottle opener can be combined with other types of devices, i.e. a lighter, to make a combined tool. It would therefore be obvious

to one skilled in the art at the time the invention was made to modify any of the Cohen patents by using a bottle opener instead of a pen <u>because</u> either Kietaibl or Kee suggests the use of such a combination device wherein one of the tools is a bottle opener thus allowing the user to have a combination opener and shaker noise device.

Response to Arguments

5. Applicant's arguments filed 9 March 2004 have been fully considered but they are not persuasive.

Claims 26 and 27 are prior claims 72 and 73 in the parent application, thus they are still rejected on the same art. In addition, as the claim for priority is not granted, applicant's prior design patents are now prior art.

Conclusion

6. This is a CON of applicant's earlier Application No. 09/865,349. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS**MADE FINAL even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory

Art Unit: 3723

action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 703-308-1746. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pairdirect.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (tollfree).
